

ENGINEERED FOR MOTION

514 Series Heavy Duty Push Plate Switch Posts

BLANK POST

POST WITH 59J-H IN 1010 SURFACE BOX

Product Description

BASIC USE

The 514 Series Switch Posts are designed to provide a free standing self-contained door activation device that can be installed at any location.

As an economical alternative to larger bollards, the 514 offers a sleek look. The 514 features a surface external foot for stability and easy installation, and an ABS rust shield. The 514 bollard is constructed for use with jamb-width switches, and is best complimented with a 59J switch in a 1010 surface box.

The 514 comes standard prepped for wiring, and can be customized in the field. It is available stand alone, with a switch installed, or with a switch and wireless transmitter installed.
