

DH-BDB

Universal Mounting Bracket

INSTALLATION INSTRUCTIONS

Section 1

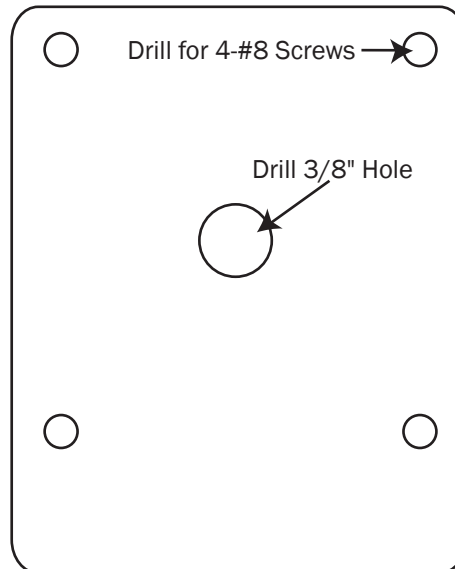

General Description

The DH-BDB bracket is a universal mounting device for the DH400 presence detector. It allows for more flexible mounting options when the installation calls for it.

Section 2

Installation

1. Using the DH-BDB Bracket as a template, mark and drill the 5-hole pattern on desired location.

2. Attach the DH-BDB Bracket using 4-#8 x 5/8" screws (supplied).
3. Feed the wire harness through the large center hole.
4. Attach the DH400 to the backplate with the two #8 x 5/8" screws supplied **with the DH400** and terminate wires (see DH400 Installation Manual).
5. Loosen 1/4-20 hinge bolt and position the detector. Tighten bolt.
